

**7 trends
to influence
e-commerce**

the age of the super hero

shopping addiction & internet addiction – two of the most common modern age habits – blend in a revolutionizing **superpower: shopping**

a day in the life of the consumer

Now, he / she
wakes up, eats,
works & lives
accompanied by
technology
or through it

the morning wake up call...

. from the mobile phone

Reading the news is on the go on phone or iPad

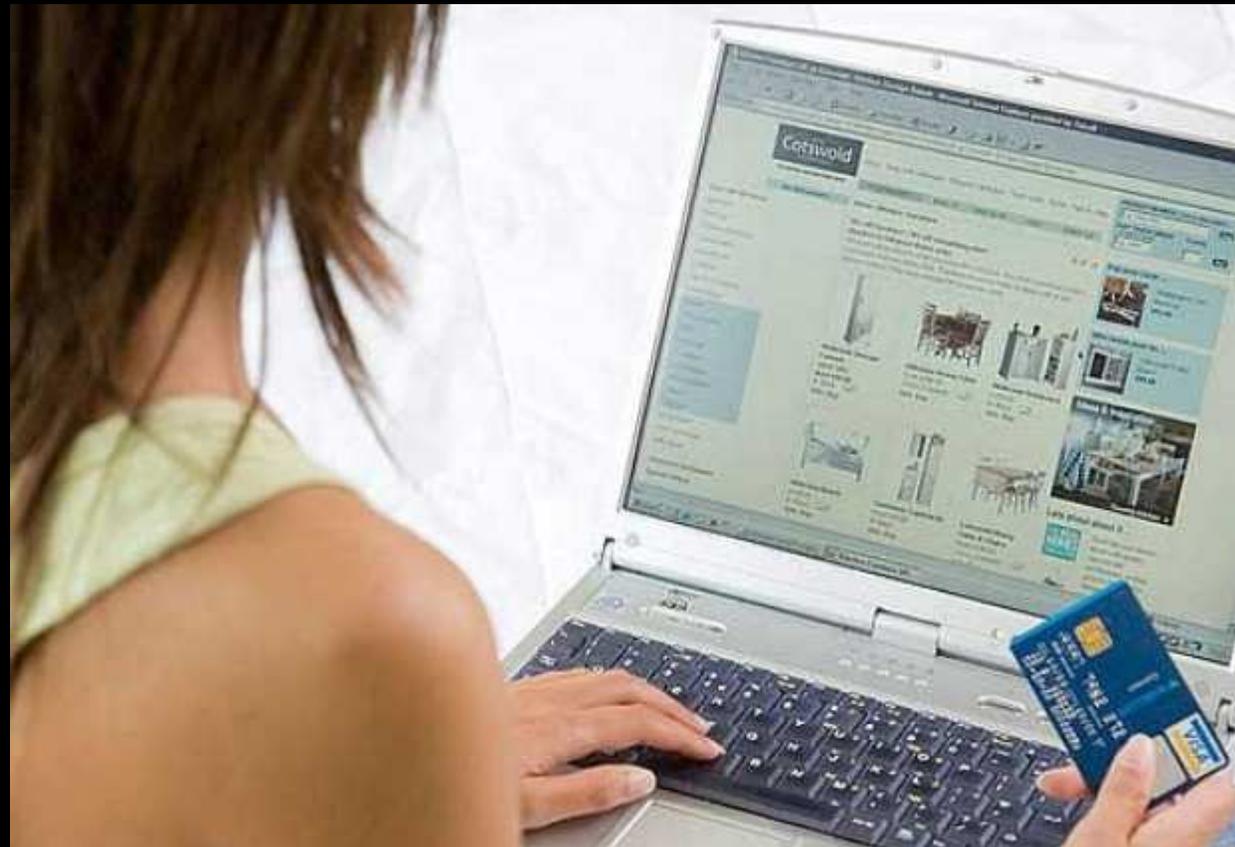

Paper work has turned into computer work

Eating at the office often
means eating by the computer

shopping has a new dimension

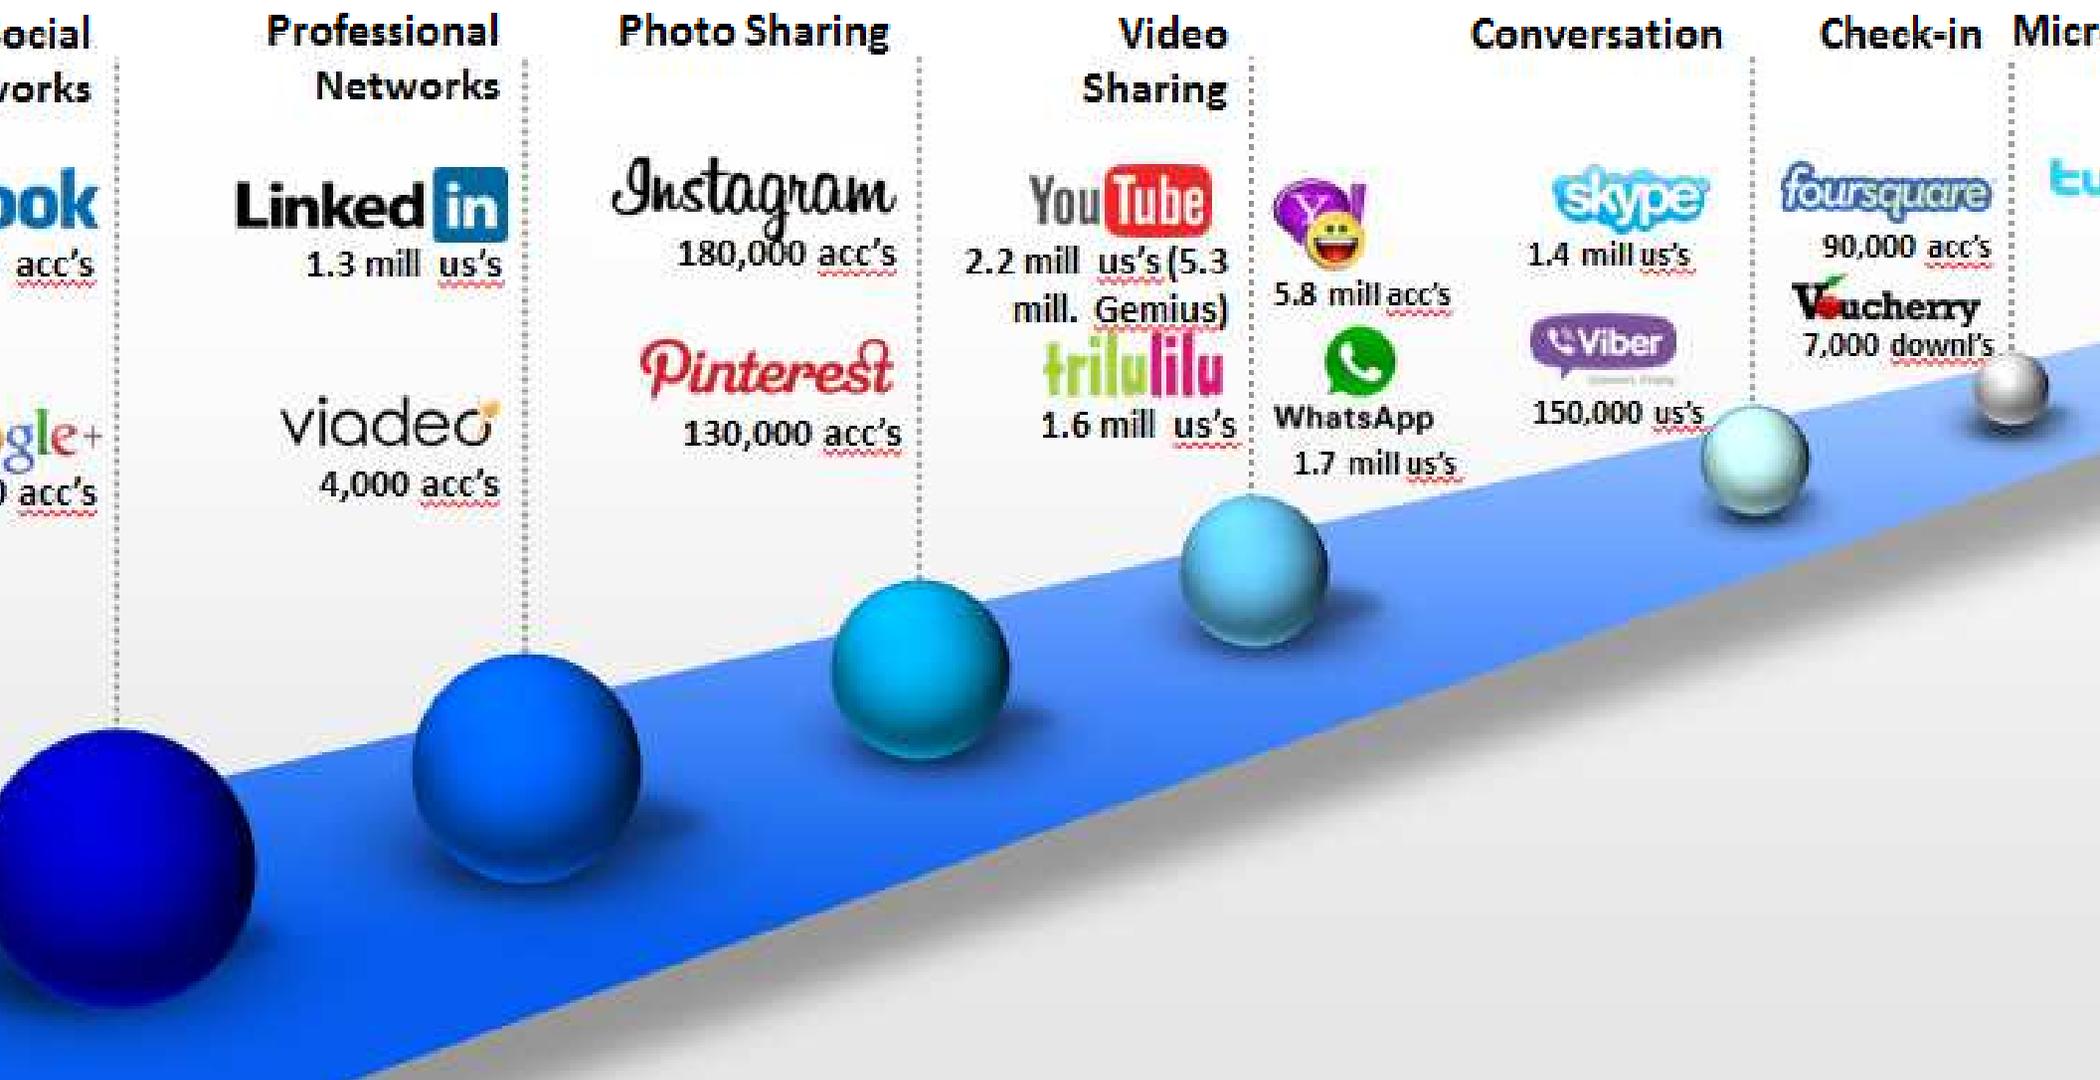

family time looks like this
nowadays...

Falling asleep means browsing the phone

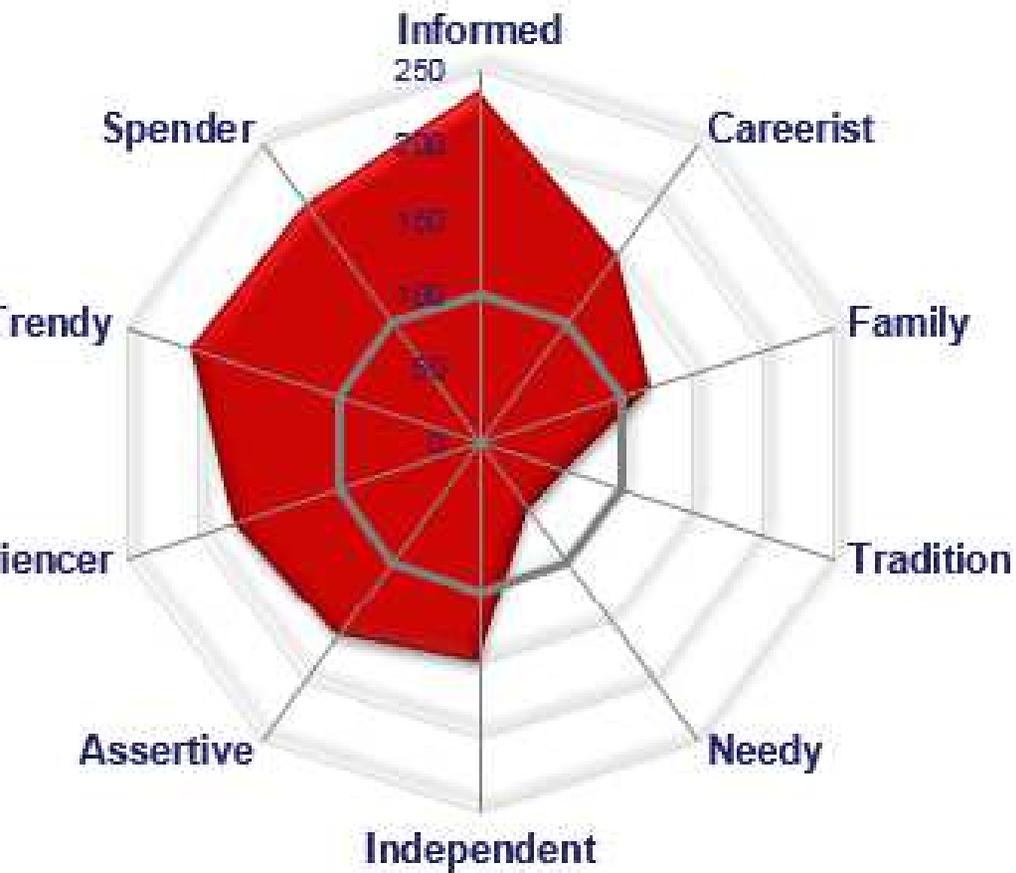

Social Media (user accounts)

Lifestyle Profile of Online Shoppers

ers

Lifestyle Profile

Leisure Profile

lifestyle profile of e-shoppers/KOC

spenders. these viewers satisfy all their wishes by accessories in **trends** or the latest gadgets and electro/IT

they are informed and updated with the latest news & data; they know well what, where and how to find information

killers. they never hesitate to be the center of attention in their social media. also, enjoy living new experiences. try to balance a family life with a successful **career**, but the career is the primary

ive persons. they value their time: rather spend their time at **bars/clubs** or **restaurants** with their friends or family. they are **books** fans. preoccupied to have a fresh, healthy look they prefer **sports**, go **shopping** and indulge themselves by going to **centers.**

redictions

age range expansion: young consumers getting older, while other young people add up to the cluster

transition from elite consumer to mass market (including rural areas)

not only high-educated consumers

different spending capability and consumption patterns

attention span decrease as becoming more and more exposed to advertising

relevant data: sum-up

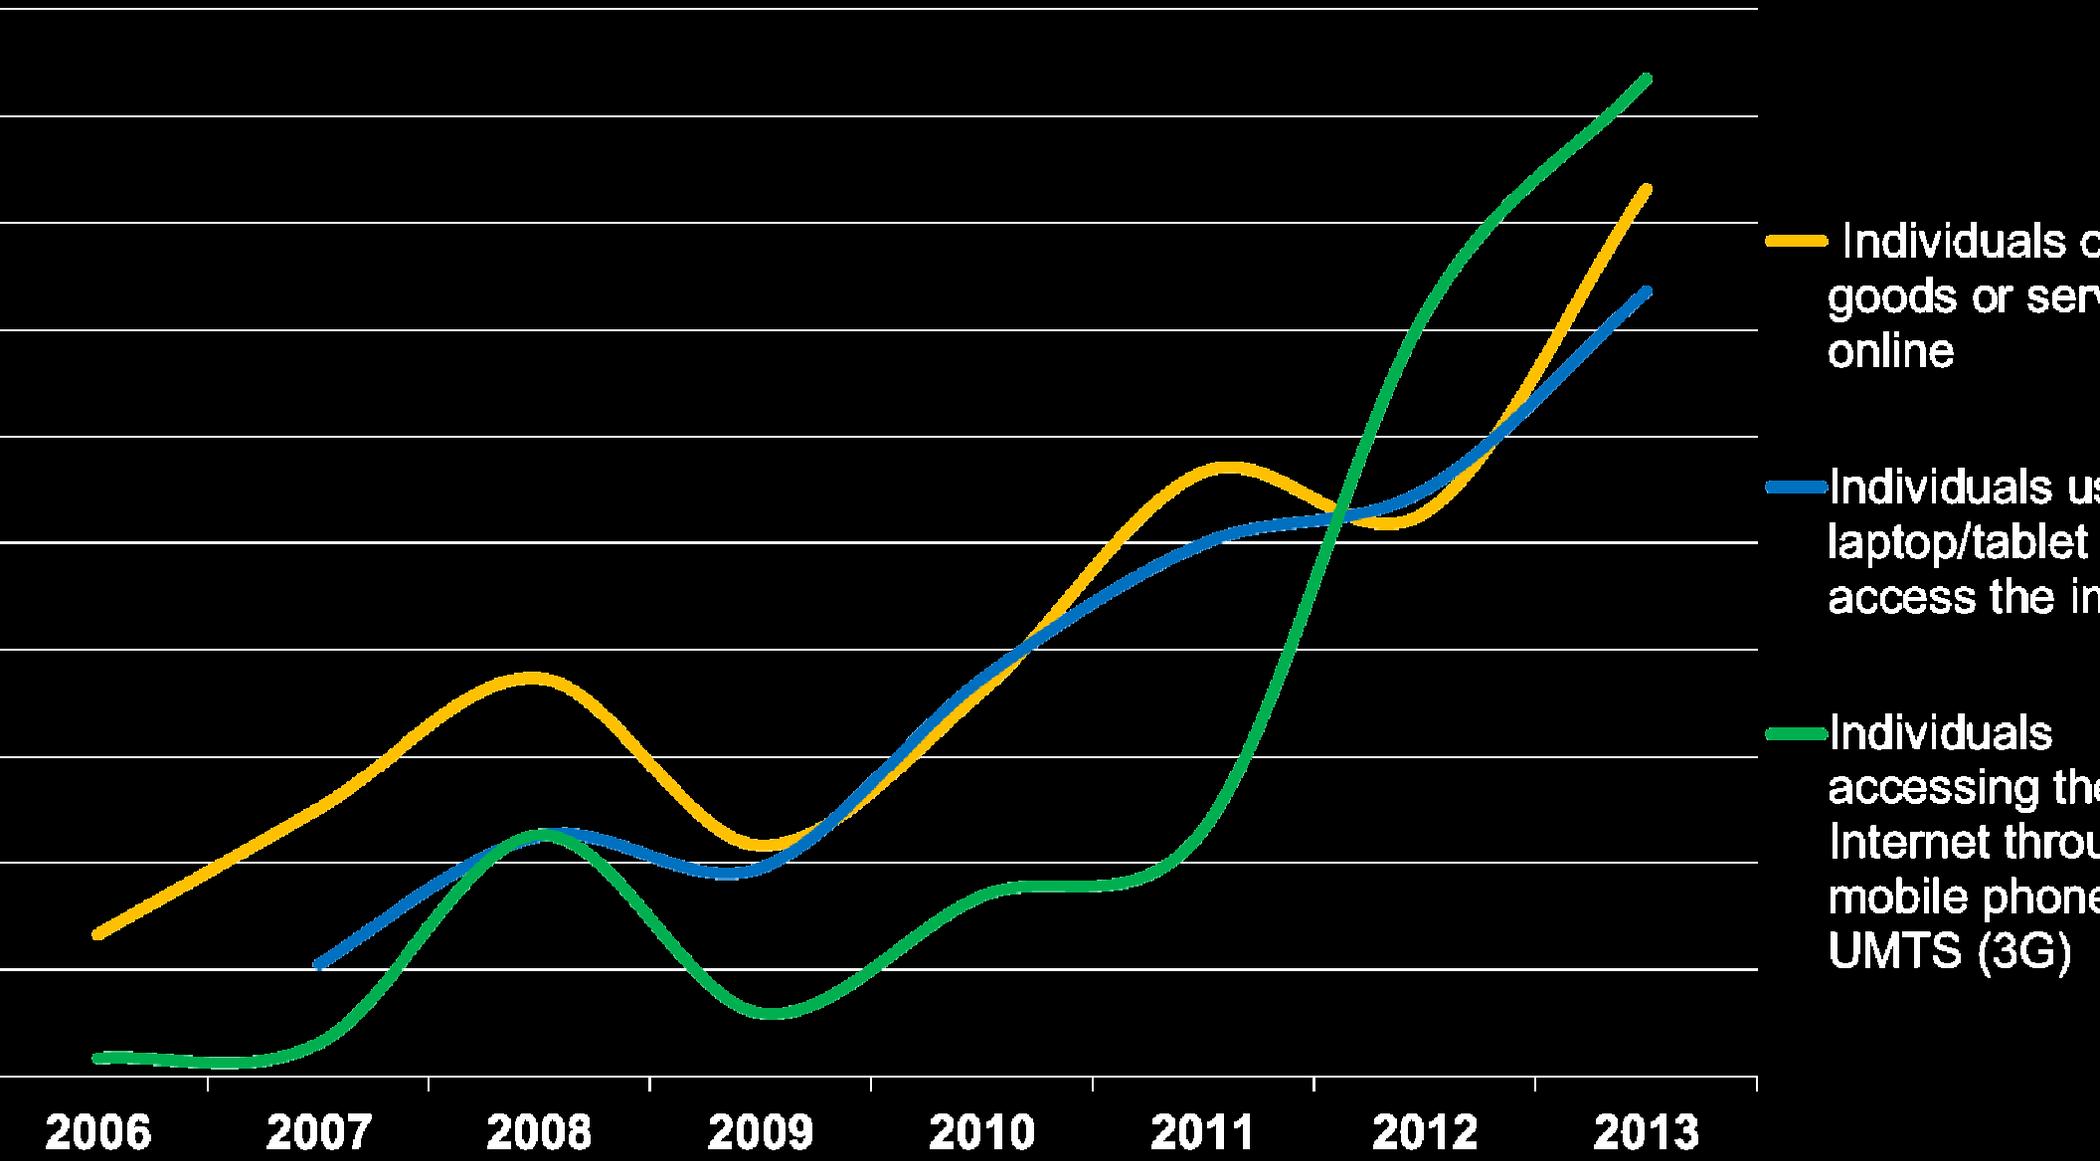

the average time spent online by each active Romanian Internet user is almost 3 hours/day and for all the internet users

that sums up to **30 million hours/day spent online Romanians**, mainly the ones in urban areas

recreational and job-related online **activities** blend in a mix that is focused on e-mail sending / reading & online search, while online banking and shopping online activities are the least frequent activities online; however, those two are the sectors expected to grow in the near future.

the **time spent online** has increased significantly due to the **penetration of mobile devices** (notebooks, tablets, smartphones) and **affordable data packages from mobile operators**.

mobile devices (laptop/ tablet/ mobile)

other findings

last year **over 1.5 million Romanians have ordered online goods or services**, which accounts for 8.3% of all individuals aged 16-74

although this may seem a small figure, if we compare it with 77% of the population e-commerce platforms users or even compare it with the 47% average for EU, the Romanian e-commerce market has known **an unprecedented growth** within an year

the number of Romanians who have purchased online goods or services in 2013 is **83% bigger than the one in 2012**

online / offline interconnectivity

online buying decision is very much influenced by offline experiences and traditional communication

online shoppers do trust Brands

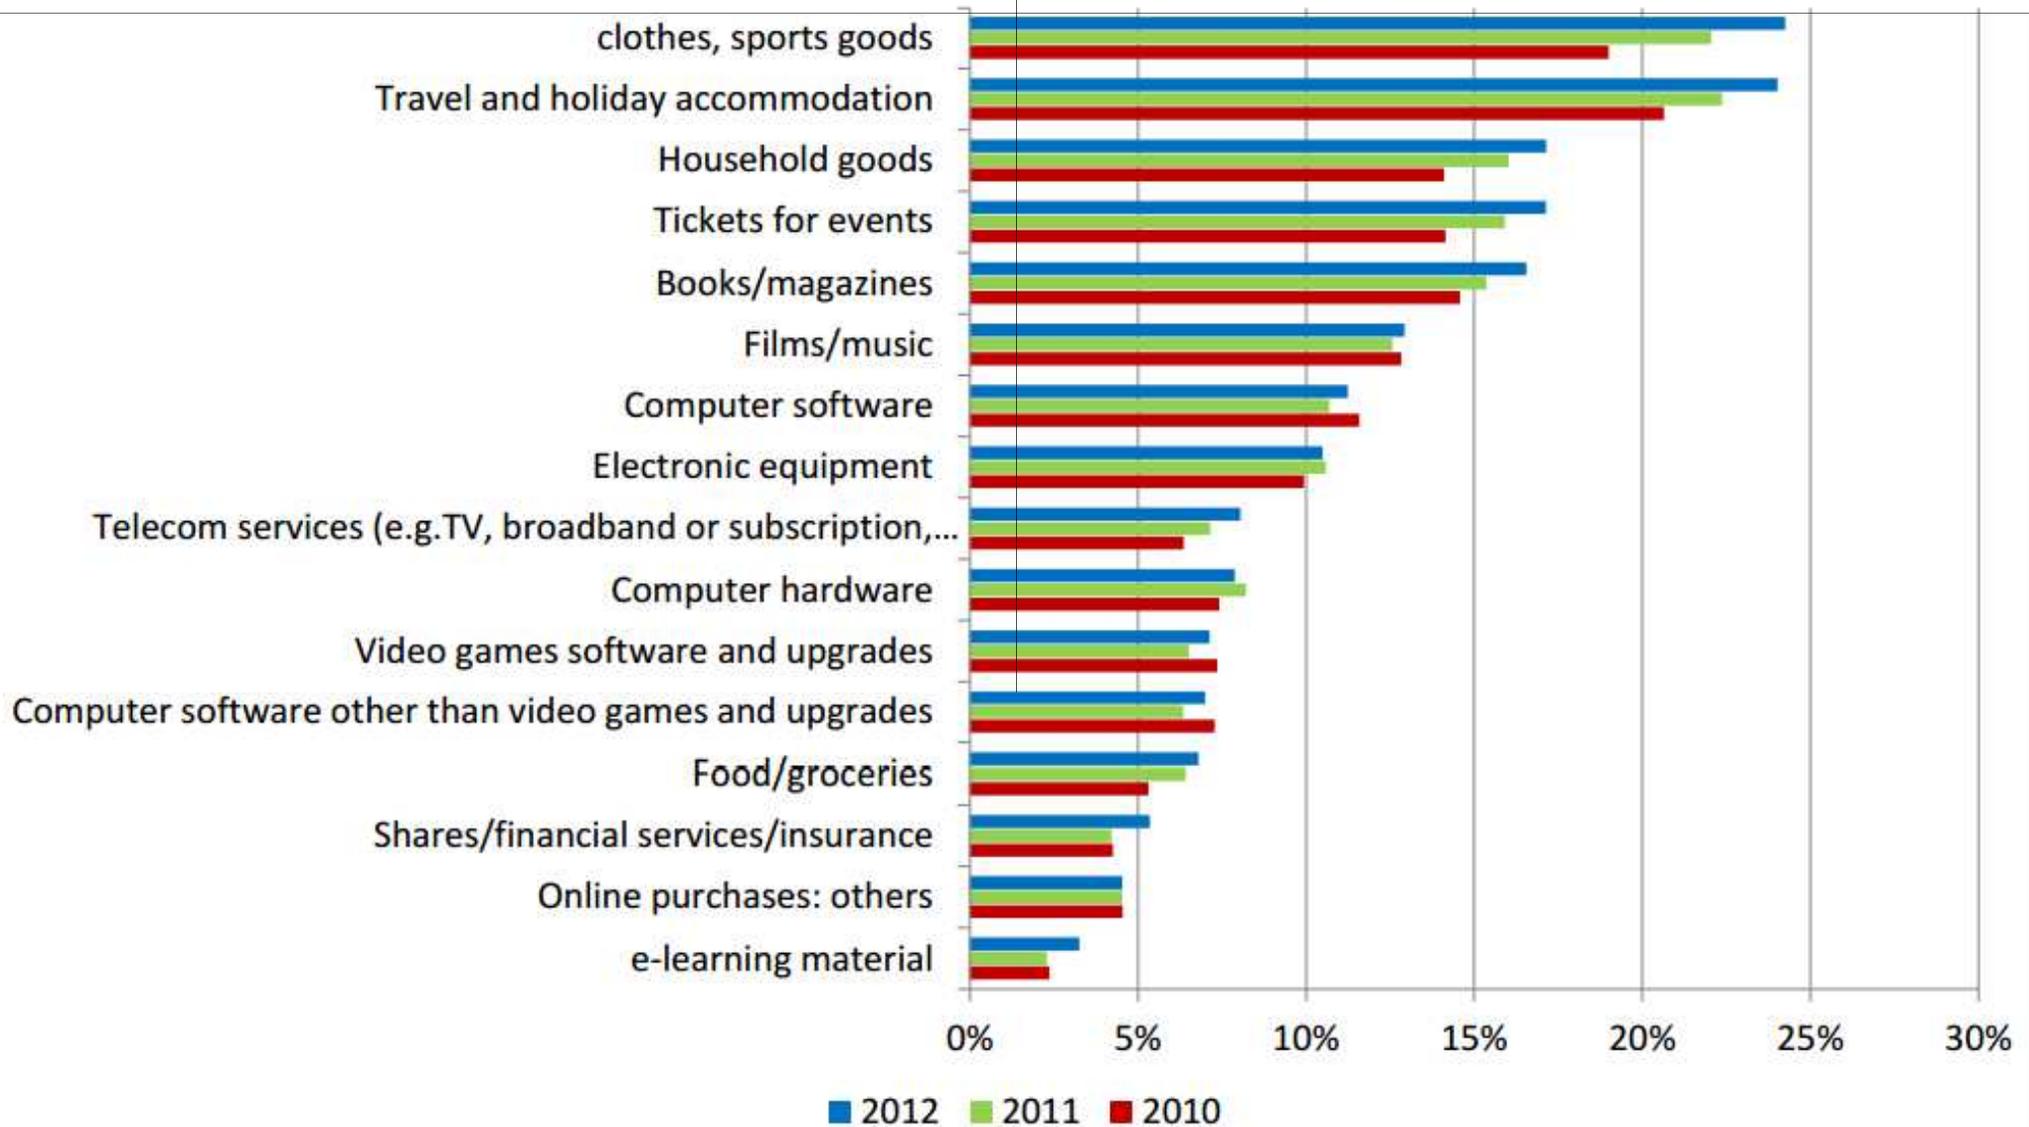

the largest online retailer in Romania became the second traditional advertising spender in retail category in 2013

65% of its advertising budget went on TV spending, thus becoming the biggest TV advertising spender in retail category

Omnichannel ubiquity is the key

Types of goods or services bought / ordered online in EU

Types of goods or services bought or ordered over the internet in the last 12 months in the EU27 (% individuals who bought over the internet)

Shopping online – barriers

online payment solutions not trustworthy in consumer perception (over **80% Romanian e-shoppers chose “payment delivery” option**)

lack of “real shopping” experience specific to offline shopping (visual, smell, feel and touch)

lack of the social dimension of shopping: interaction with merchandisers, other clients the friends that might come along with shopping enjoyment

lack of control over the technical specs of the products cannot be tried on or viewed before buying

delayed gratification versus offline purchase

lack of trust in receiving the exactly product or

7 extreme - trends

‘me time’

even when we are “very social” we actually grow apart more and more

the simple act of standing one beside the other browsing our phones does not replace “togetherness”

however, it does **help increase online time spent / day**

and it does **help increase the need of “indulging ourselves”** along with a higher rate of self-pampering spending, including online spending

2. EXTREME Integration

integration of platforms & devices

interconnectivity until they merge together

*“An iPod, a phone, an internet mobile communicator... these are NOT three separate devices! And we are calling it iPhone! Today Apple is going to reinvent the phone. And here it is”
(Steve Jobs)*

Google Wallet – “Shop. Save. Pay.
With your phone”

trading privacy concerns for

Of extreme upgrading

“Bill Gates is a very rich man today... and do you want to know why? The answer is one word: versions”

(Dave Barry, New York Times bestselling author)

the quest for the improved formula of everything there is, from software to furniture

we live by the temporary law of the constantly evolving science of performing better that producers use to make us buy more, and desperately desire the newer version

4. extreme glamification

tendency to “glam up” your life

the idea of adding a sparkle and stylish touch to your life in order to present it in a brighter light

this may lead to **buying aspirational brands** & can definitely affect buying decision when it comes to discount prices for designer fashion labels; some examples of online outlet stores that give access to high end goods at lower prices

b. extreme mobility

growing importance of “**on the go**” factor

highest appreciation for 7/7 – 24/24

instant communication, instant decision making, instant buying

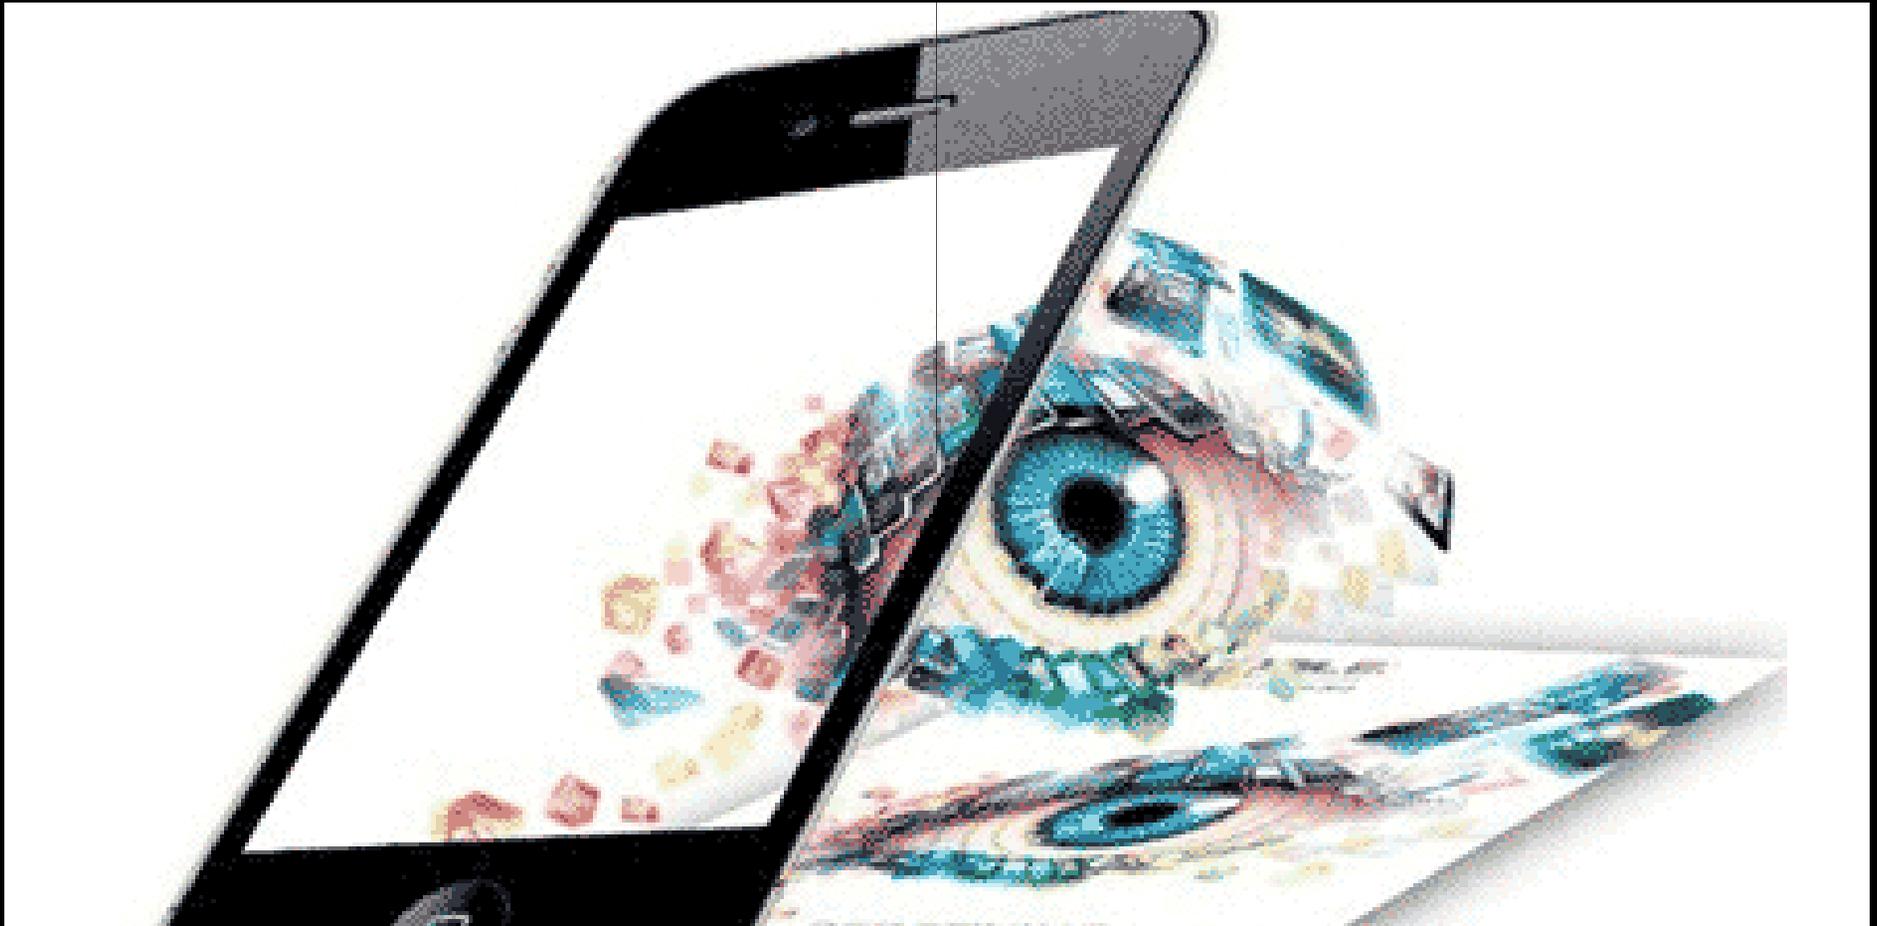

time efficiency to its peak

o. extreme connectivity

- one screen lifestyle

- due to penetration of mobile connectivity solutions

7. extreme sociability

people tend to be more and more oriented towards sharing thoughts, opinions and emotions

they want to feel connected to the ones around them or build bridges towards the ones they don't know yet

the same it is with brands 😊

online socializing brought brands closer to people than ever before

human & brands are ready for the next level: cyber

thank you
